

## neoHub+

### Setting up your neoHub+

neoHub+ is designed to be quick and simple to setup.

Just follow the quick start set up sequence and you will soon have total control over your home heating system.

#### System requirements

- An active broadband connection
- 230v mains supply (adaptor supplied)
- A broadband router with DHCP function
- A mobile device running iOS or Android Operating System.

### 1 Connect power

Connect the power supply to the neoHub+.

Connect the neoHub+ to the router with the Ethernet cable provided – the router will assign an IP address to the neoHub+.

### 2 Download application

Connect your mobile device to the same wifi network as your neoHub+. Download the FREE Nu-Heat neoApp and register your account.

### 3 Add location

Once registered, select the [Add Location](#) option and follow the instructions.

### 4 Connect to neoHub+

Press the connect button on the neoHub+ to add the location to your account.

### 5 Name your neoHub+

When successfully connected, add a title for the new location (e.g. Home) and configure the time zone for the system.

6

**Add zone**

The next step is to join neoStats to the neoHub+. Select **Add Zone** in the neoApp.

7

**Assign a zone name**

You should now enter the name for this new zone and then press **Add Zone**.

8

**Pair your neoStat**

- 1 Use the </> keys to select **SETUP** and press ✓
- 2 Feature **01** is displayed on screen
- 3 Press ✓ to pair the neoStat to the neoHub+
- 4 The symbol appears flashing on the display
- 5 When the neoStat successfully connects to the neoHub+ the symbol will then be permanently displayed

9

**Add another zone**

When complete, press **Next** and repeat these steps for all additional zones on the network.

When all zones have been added, press **Finish** on the app to complete setup.

**Control your Nu-Heat thermostats using Apple HomeKit****1. Pair your Nu-Heat neoHub+ with the Home app**

Open the Home app on your iOS device, select **Get Started**, then click **Add Accessory**. The Home app now scans for compatible HomeKit devices. Click on **neoHub+** when prompted, then scan the HomeKit setup code on the reverse of your neoHub+ with the camera on your iOS device.

Select **Location**, then create a new room by entering your own title or select from the rooms suggested. Press **Next** to confirm settings for your neoHub+.

**2. Assign your thermostats to rooms**

The service name is displayed at the top of the screen. Rename the thermostat service as you would like to refer to it via Siri voice control, and assign it to the relevant room. Repeat this process for all of your devices and then tap **Done** to finish configuring your settings.

**3. Create automations, share control and configure other HomeKit enabled devices**

Learn how to set HomeKit automations, use Siri voice control, add users and configure other Apple devices with the iOS10 Home app – visit:

[www.apple.com/uk/ios/home](http://www.apple.com/uk/ios/home)

Apple HomeKit technology provides an easy, secure way to control your home's lights, doors, thermostats, and more from your iPhone, iPad, or iPod touch. The Nu-Heat neoHub+ responds to Siri, letting you request the current temperature, set a new temperature or temperature hold and turn on/turn off standby directly from your iPhone, iPad, or iPod touch.

**Compatibility**

The neoHub+ enables the neoStat, neoAir, neoPlug & neoUltra to work with HomeKit technology. See [www.nu-heat.co.uk/homekit](http://www.nu-heat.co.uk/homekit) for more details.

To control this HomeKit-enabled accessory, iOS 9.3.2 or later is recommended.

Communication between the Nu-Heat neoHub+ and neoStat, neoAir, neoPlug & neoUltra is secured by utilising frame-protection mechanism based on Advanced Encryption Standard (AES) with 128-bit randomly generated keys.

Use of the Works with Apple HomeKit logo means that an electronic accessory has been designed to connect specifically to iPod touch, iPhone, or iPad, respectively, and has been certified by the developer to meet Apple performance standards.
